Research Interests

My research focuses on **Natural Language Processing** and **Knowledge Representation**, with an emphasis on large reasoning models, relational knowledge graph completion, contrastive representation learning, and bias mitigation in language models.

Education

University of Artois

Ph.D. in Artificial Intelligence

Thesis: Modelling Relational Knowledge

Supervisor: Zied Bouraoui Labs: CRIL & Grammatica

Expected: October 2026

France

2023 – Present

University of Artois

M.Sc. in Software Engineering (Apprenticeship)

Project: Process Automation

France

2021 – 2023

Teaching Experience

University of Artois — Jean Perrin Faculty

Teaching Assistant

Algorithmics 2, L1 (2nd semester) — 128 hours

Practical Deep Learning, M.Sc. 2 — 20 hours

2023 – 2026

Publications

Conference Proceedings

[1]: Naïm Es-Sebbani, Esteban Marquer, Yakoub Salhi, Zied Bouraoui.

Evaluating Robustness of Reasoning Models on Parameterized Logical Problems.

International Conference on Machine Learning (ICML 2026).

[2]: Waheed Ahmed Abro, Naïm Es-Sebbani, Zied Bouraoui.

Learning Long-Document Embeddings via Chunk-Context Entailment.

Language Resources and Evaluation Conference (LREC 2026).

[3]: Naïm Es-Sebbani, Esteban Marquer, Zied Bouraoui.

Modeling Complex Semantic Relations with Contrastively Fine-Tuned Relational Encoders.

Association for Computational Linguistics (ACL 2025).

[4]: Rameez Qureshi, Naïm Es-Sebbani, Luis Galárraga, Yvette Graham, Miguel Couceiro, Zied Bouraoui.

REFINE-LM: Mitigating Language Model Stereotypes via Reinforcement Learning.

European Conference on Artificial Intelligence (ECAI 2024).

Talks & Presentations

Conference Presentations

2026: Presentation — ICML 2026

Evaluating Robustness of Reasoning Models on Parameterized Logical Problems

2026: Poster Presentation — *LREC 2026*

Learning Long-Document Embeddings via Chunk-Context Entailment

2025: Oral Presentation — *ACL 2025*

Modeling Complex Semantic Relations with Contrastively Fine-Tuned Relational Encoders

2024: Poster Presentation — *ECAI 2024*

REFINE-LM: Mitigating Language Model Stereotypes via Reinforcement Learning

Internal Presentations.....

CRIL Laboratory Day (JDD CRIL) & Ph.D. Days

Thesis Presentations

2026

Academic Service

University of Artois

France

Invited Trainer

2025 – 2026

Organised and delivered a training workshop on Large Language Models (LLMs) for faculty members.

Organisation of Scientific Meetings

2025 – Present: Co-organisation of scientific activities within the *IA2* research groups

2025 – Present: Co-organisation of scientific activities within the *IARML* research groups

2025 – Present: Participation in seminars, workshops, and research meetings at CRIL laboratory

Reviewing activities

Occasional reviewer for the *European Journal of Artificial Intelligence*

Open-Source Implementations & Research Artifacts

GitHub: github.com/essebbaninaim — Research code for relational encoders, reasoning models, and other experiments.

Hugging Face: huggingface.co/Naimmm — Datasets and models.
